Here at Smoky Hill Restoration, we take great pride in our work. With over 50 years of collective experience in our shop, we know exactly what it takes to build a car of the highest quality. Whether you want to restore a car back to original, or build a one of a kind custom, we've got you covered. We do all of the work on these cars in-house, with the exception of the upholstery.

One of our specialties is taking a classic body design and integrating it with a modern frame/drivetrain. A perfect example of this can be seen with our '57 - Z06 project. We have taken an original 1957 Chevrolet Bel Air and widened the body to fit perfectly onto a 2007 Corvette Z06 chassis and drivetrain. This allows for classic styling with state of the art performance and handling.

Located in the small rural town of Granbury, TX we are only 30 short minutes from Fort Worth. In our 16,000 sq. ft. facility you will find the paint building which houses a full paint booth and mixing center, two main fabrication buildings, and a final assembly building. With a total of 10 different car/truck lifts as well as a motorcycle lift, we can work on virtually any vehicle.

We encourage anyone and everyone to come out to our shop and take a look. We may be busy (with over 20 projects in-house we've always got work to do), but that won't stop us from taking time out to meet new people and show them around.

At Smoky Hill Restoration our motto is simple -- If you can dream it, we can build it.

**All labor is \$125/hr and is backed by our Lifetime Warranty\***

- Chassis Building / Customizing**
- Body Modifiactions**
- Full Restoration / Refinishing**
